

Hi,

As a **Senior Product Development Engineer** at **Harman Connected Services** giving service to **Mercedes Benz Research and Development**. Considering my significant programming experience, technical expertise in software development, I am confident I have the key skills to be an asset.

I have gained hands-on experience in coding in multiple languages and frameworks such as **Golang-Gin, Golang-GorillaMux, Kotlin-Springboot** and with Python-flask and Java-Springboot.

Few of my standout responsibilities are,

- Created the Boilerplates and developed a cutting-edge Voice Activated Quiz service with **user audience of 70,708K** which has **3 REST API** endpoints.
- Currently engaged in the migration of a Python-flask microservice of **2 REST APIs** where Navigation is triggered through voice to Golang-GorillaMux microservice which increased the performance of the service by 60%.
- Implemented the UI for presenting the tariff details from external provider and calculating final estimations of costs for better pricing information display with **user audience of >60K**.
- Monitored using **Datadog** and reduced the downtime by 10% and stability by 5% during my **System Readiness Review (SRR)** window.
- I am a strong believer of **SAFe Agile** working environment and have gained **3+years'** experience in it.
- Facilitated the onboarding process by delivering comprehensive **Knowledge Transfer (KT)** sessions.

I have attached my resume for your perusal. I hope it can help you learn more about my background, qualifications and experience. I look forward to sharing more about my skills and learn more about the vacant position.

Thank you for your time and consideration.

Regards,
Varshitha M R
